

AFTER INSTALL FREEBSD

update freebsd && install apps on freebsd, ada 2 cara update dan install aplikasi di freebsd :

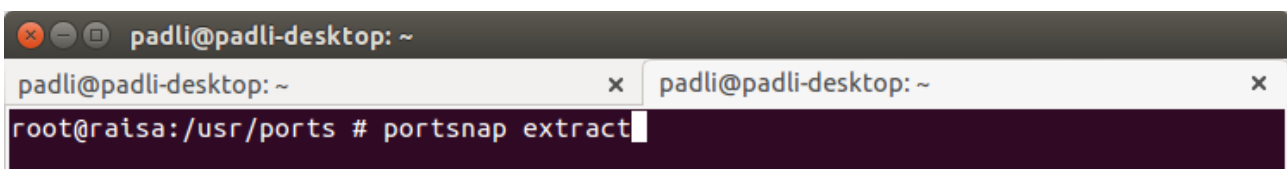

- lewat portsnap
- lewat pkg

1. update freeBSD "portsnap fetch update" atau "pkg install update"

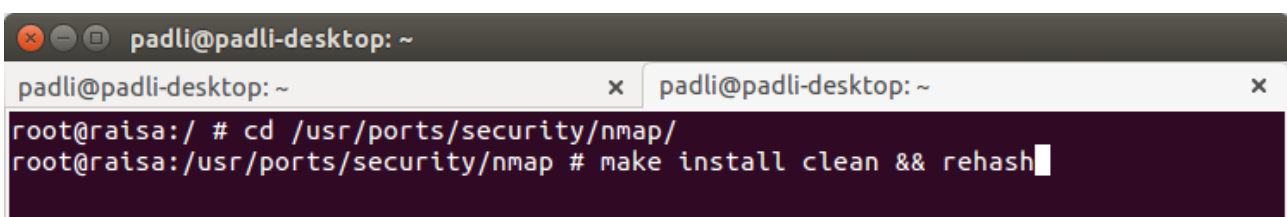

```
padli@padli-desktop: ~  
padli@padli-desktop: ~ x padli@padli-desktop: ~ x  
root@raisa:/usr/ports # portsnap fetch update
```

2. extract update "portsnap extract" all /usr/ports

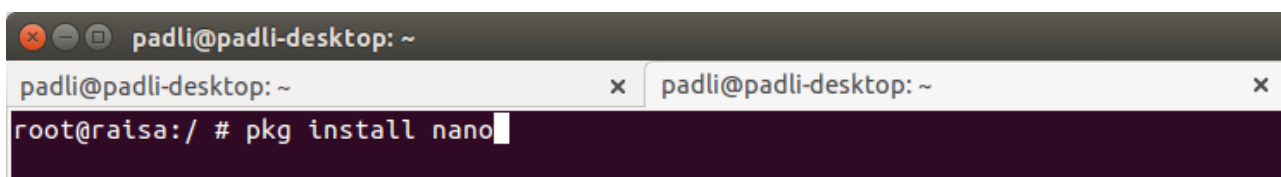

```
padli@padli-desktop: ~  
padli@padli-desktop: ~ x padli@padli-desktop: ~ x  
root@raisa:/usr/ports # portsnap extract
```

3. install nmap lewat ports "cd /usr/ports/security/nmap/" && "make install clean" && "rehash"

```
padli@padli-desktop: ~  
padli@padli-desktop: ~ x padli@padli-desktop: ~ x  
root@raisa:/ # cd /usr/ports/security/nmap/  
root@raisa:/usr/ports/security/nmap # make install clean && rehash
```

4. install nano lewat pkg tools "pkg install nano"

```
padli@padli-desktop: ~  
padli@padli-desktop: ~ x padli@padli-desktop: ~ x  
root@raisa:/ # pkg install nano
```
